**PRELIMINARY AMENDMENT**

APPLICANT: Ludwig Hofmann DOCKET NO: 112740-152  
SERIAL NO: GROUP ART UNIT:  
EXAMINER:  
INTERNATIONAL APPLICATION NO: PCT/DE99/00071  
INTERNATIONAL FILING DATE: 14 January 1999  
INVENTION: A MOBILE TELECOMMUNICATION DEVICE

15 Assistant Commissioner for Patents,  
Washington, D.C. 20231

Sir:

Please amend the above-identified International Application before entry  
into the National stage before the U.S. Patent and Trademark Office under 35 U.S.C.  
§371 as follows:

**In The Specification:**

On page 1, cancel lines 1-4 and substitute the following therefor:

**--S P E C I F I C A T I O N**

25

**TITLE**

**A MOBILE TELECOMMUNICATION DEVICE**

**BACKGROUND OF THE INVENTION**

**Field of the Invention**

The present invention relates, generally, to a mobile telecommunication  
device which transmits messages to a number of different subscriber stations via  
either a number of radio frequencies or different transmission methods and, more  
particularly, to such a mobile telecommunication device wherein the radio frequency

or transmission method is selected or changed depending upon the location of the mobile telecommunication device.

**Description of the Prior Art--.**

- On page 1, line 12, cancel "which, for" and substitute therefor --. For--.
- 5 On page 1, line 13, insert --such satellites-- before "are".
- On page 1, line 22, cancel "object on which the" and substitute therefor --present---.
- On page 1, line 22, cancel "is based".
- On page 1, line 22, insert a --,-- after "is" and before "therefore".
- 10 On page 1, line 22, insert --, directed-- after "therefore".
- On page 1, line 23, cancel "specify" and substitute therefor --specifying--.
- On page 1, line 23, cancel "by means of" and substitute therefor --via--.
- On page 1, line 23, cancel "the" after "which".
- On page 1, line 24, insert --such-- before "different".
- 15 On page 1, line 24, insert --telecommunication-- after "different".
- On page 1, line 24, insert a --,-- after "regulations".
- On page 1, lines 24-25, cancel "relating to telecommunication".
- On page 1, line 26, insert a --,-- after "time".
- On page 1, line 26, cancel "This object is achieved by the".
- 20 On page 1, cancel line 27 and substitute the following centered heading therefor:

**--SUMMARY OF THE INVENTION--.**

- On page 1, line 28, cancel "ensured," and substitute therefor --Thus, the present invention teaches--.
- 25 On page 1, line 29, insert --either-- after "via".
- On page 1, line 30, cancel "by means of".
- On page 1, line 31, cancel "and" and substitute therefor --. The present invention further teaches--.
- On page 1, line 35, cancel "that" and substitute therefor --wherein--.

On page 1a, line 1, insert --present-- before "invention".

On page 2, line 6, cancel "in the sense of" and substitute therefor --contemplated by--.

On page 2, line 9, insert --could be used-- after "devices".

5 On page 2, line 10, cancel "can be used".

On page 2, line 13, cancel "means for".

On page 2, line 14, insert --devices which connect or disconnect-- after "disconnecting".

10 On page 2, lines 14-15, cancel "in dependence" and substitute therefor --depending--.

On page 2, line 15, cancel "on" after "or".

On page 2, line 17, insert --present-- before "invention".

On page 2, line 17, insert a --,-- after "account".

On page 2, line 18, insert a --,-- after "manner".

15 On page 2, line 21, cancel "in that" and substitute therefor --wherein--.

On page 2, line 23, insert --present-- before "invention".

On page 2, line 24, cancel "means for" and substitute therefor --a--.

On page 2, line 25, insert --device which determines-- after "determining".

On page 2, line 25, cancel "means for" and substitute therefor --a--.

20 On page 2, line 26, insert --device which generates-- after "generating".

On page 2, line 26, cancel "in dependence" and substitute therefor --depending--.

On page 2, line 29, insert --present-- before "invention".

On page 2, cancel lines 30-32 and substitute the following therefor:

25 --Additional features and advantages of the present invention are described in, and will be apparent from, the following Detailed Description of the Preferred Embodiments and the Drawings.

**DESCRIPTION OF THE DRAWINGS--.**

On page 2, line 34, cancel "according to" and substitute therefor --of--.

On page 2, line 34, insert --present-- before “invention”.

On page 3, line 2, cancel the “.” and substitute therefor --; and--.

On page 3, line 4, cancel “according to” and substitute therefor --of--.

On page 3, line 5, insert --present-- before “invention”.

5 On page 3, before line 6, insert the following centered heading:

**--DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS--**.

On page 3, line 13, insert a --,-- after “example”.

On page 3, line 14, insert a --,-- after “satellites”.

On page 3, line 18, cancel “e.g.” and substitute therefor --such as--.

10 On page 3, lines 23-24, cancel “the utilization of”

On page 3, line 25, cancel the “,” after “links” and substitute therefor a --;--.

On page 3, line 25, insert a --,-- after “e.g.”.

On page 3, line 28, cancel “The” and substitute therefor --As such, the--.

On page 3, line 28, cancel “according to” and substitute therefor --of--.

15 On page 3, line 28, insert --present-- before “invention”.

On page 3, line 28, cancel “thus”.

On page 3, line 29, insert a --,-- after “device”.

On page 3, line 30, insert a --,-- after “devices”.

On page 4, line 5, cancel “e.g.” and substitute therefor --for example,--.

20 On page 4, line 7, insert a --,-- after “18”.

On page 4, line 8, cancel the “-“ and substitute therefor a --(--.

On page 4, line 9, cancel the “-“ and substitute therefor a --)--.

On page 4, line 11, cancel the “,” after “algorithms”.

On page 4, line 13, cancel the “,”.

25 On page 4, line 14, insert a --,-- after “and are”.

On page 4, line 15, insert a --,-- after “thus”.

On page 4, line 18, cancel “these” and substitute therefor --this--.

On page 4, line 18, cancel “must” and substitute therefor --would--.

On page 4, after line 19, insert the following paragraph:

--Although the present invention has been described with reference to specific embodiments, those of skill in the art will recognize that changes may be made thereto without departing from the spirit and scope of the invention as set forth in the hereafter appended claims.--

- 5           On page 6 (last page), cancel line 1, and substitute the following centered heading therefor:

**--ABSTRACT OF THE DISCLOSURE--**.

On page 6, line 5, insert --either-- after "via".

On page 6, line 6, cancel "by means of".

- 10           On page 6, line 11, insert --, wherein the mobile telecommunication device-- after "device".

On page 6, lines 12-13, cancel ". This provides for conformance" and substitute therefor --so as to conform--.

On page 6, cancel line 17.

- 15           **In the Claims:**

On page 5, cancel line 1, and substitute the following left-hand justified heading therefor:

**--I Claim As Our Invention:--**.

- 20           Please cancel claims 1-3, without prejudice, and substitute the following claims therefor:

4.           A mobile telecommunication device, comprising:  
a facility for transmitting messages to a plurality of subscriber stations via one of a plurality of radio frequencies and different transmission methods; and  
a facility for evaluating at least one control signal depending on a position  
25 of the mobile telecommunication device for selecting and changing the radio frequencies and transmission methods.

5.           A mobile telecommunication device as claimed in claim 4, wherein the facility for transmitting messages includes one of a plurality of radio

facilities and a plurality of controllers, and wherein the mobile telecommunication device further comprises means for connecting and disconnecting the plurality of radio facilities and the plurality of controllers depending on at least one control signal.

5

6. A mobile telecommunication device as claimed in claim 4, further comprising:

means for determining the position of the mobile telecommunication device; and

10 means for generating a control signal depending on the position of the mobile telecommunication device.

#### **REMARKS**

15 The present amendment makes editorial changes and corrects typographical errors in the specification in order to conform the specification to the requirements of the United States Patent practice. No new matter is added thereby. Original claims 1-3 have been canceled in favor of new claims 4-6. Claims 4-6 have been presented solely because the revisions by bracketing and underlining which would have been necessary in claims 1-3 in order to present those claims in accordance with

20 preferred United States Patent practice would have been too extensive, and thus would have been too burdensome. The amendment is intended for clarification purposes only and not for substantial reasons related to patentability pursuant to 35 U.S.C. §§101, 102, 103 or 112. Indeed, the cancellation of claims 1-3 does not constitute an intent on the part of the Applicant to surrender any of the subject matter

25 of claims 1-3.

Early consideration on the merits is respectfully requested.

Respectfully submitted,

(Reg. No. 39,056)

## Description

## Mobile telecommunication device

5

In conventional systems for wireless telecommunication, mobile subscriber stations usually communicate via stationary facilities of the infrastructure. In contrast with this, satellite systems are now planned or being set up in which the infrastructure, that is to say the base stations, are implemented by satellites which, for various reasons, are not geostationary but orbit the earth at a relatively low altitude and, in doing so, continuously change their location in relation to the earth's surface.

In the course of their movement around the globe, these mobile telecommunication devices will fly successively over the territories of different countries in which different regulations for utilizing frequencies or transmission protocols apply. The object on which the invention is based is therefore to specify the technical teaching by means of which the conformance to different regulations relating to telecommunication which vary locally and possibly with time is made possible. This object is achieved by the subject matters of the present claims. It is thereby ensured, using a facility for transmitting messages to a multiplicity of subscriber stations via a number of radio frequencies or by means of different transmission methods and a facility for evaluating at least one control signal depending on the position of the telecommunication device for selecting or changing the radio frequencies or transmission methods used by the telecommunication device, that the respective applicable regulations are observed.

The invention thus provides for a very extensive, time-optimized adaptation of the mobile infrastructure facilities to

a multiplicity of national radio transmission regulations which permits better utilization of transmission resources than the use of transmission resources which have been released globally.

5 Naturally, satellites are not the only conceivable mobile telecommunication facilities in the sense of the present invention. Naturally, mobile devices on ocean-going ships or as payload of airships and similar mobile telecommunication devices in the sense of the  
10 present invention can be used.

A preferred embodiment of the present invention provides for the use of a number of radio facilities or controllers and the use of means for connecting or disconnecting these radio facilities or controllers in  
15 dependence on a control signal or on a number of control signals. This advantageous embodiment of the invention thus takes into account in a particularly simple and robust manner the fact that a satellite-supported telecommunication system is frequently in  
20 simultaneous contact with the territories of a number of countries in that suitable radio facilities can be provided for different countries.

A further preferred embodiment of the invention provides that the device is equipped with means for  
25 determining the position of the device and means for generating a control signal in dependence on the current position. This has the advantage that no special terrestrial infrastructure needs to be created for implementing the invention.

30 In the text which follows, the invention will be described with the aid of preferred embodiments and with the aid of figures, in which:

Figure 1 shows a diagrammatic representation of the interaction of a device according to the invention  
35 with a terrestrial

infrastructure for controlling the telecommunication device.

Figure 2 diagrammatically shows a preferred embodiment of the telecommunication device according to the invention using a number of radio facilities.

Figure 1 illustrates how a mobile telecommunication device 11 (satellite) can be caused to select or change the radio frequencies or transmission methods by a control signal 14 when flying over a boundary region between two locally limited mobile radio infrastructures 12, 13. The control signal can be sent out directly by terrestrial 15 (radio beacon) or other stationary devices (for example geostationary satellites etc.) or it can be generated by a device for position finding 16 in the telecommunication device itself. Thus, if the telecommunication device 11 is within transmission range of a radio beacon 15, a response, e.g. a change of frequency or operating mode, is automatically initiated in the telecommunication device.

In this manner, the mobile telecommunication device can optimally adapt to local or time-defined regulations regarding the use of frequencies or the utilization of transmission methods. It is possible, for example, to locally influence satellite links, e.g. the use of a satellite could be blocked for certain user groups in trouble spots.

The device according to the invention thus typically contains a controllable radio device or a number of such radio devices which can be switched on and off by a programmable controller. The information

regarding when this is to be done is derived from a control signal. This signal originates from an external device or is derived in the mobile telecommunication device from position data which can  
5 come, e.g. from a global positioning system (GPS).

It is advantageous if a number of radio parts 17, 18 or a radio part which can be switched to a number of frequencies - differentiated, if necessary, depending on uplink or downlink - or operating modes, is  
10 integrated into the telecommunication device. In this arrangement, the information table or algorithms, which establish the relationship between current position and the corresponding operating mode of the radio parts, are also changed by a central control station and are  
15 thus adapted to changing regulations.

Accordingly, a storage device for such tables (data records) and a processor 19 for processing and adapting these stored data must be provided in such a mobile telecommunication device.

## Patent Claims

1. A mobile telecommunication device (11) using a facility for transmitting messages to a multiplicity of  
5 subscriber stations via a number of radio frequencies or by means of different transmission methods and a facility for evaluating at least one control signal (14) depending on the position of the telecommunication device for selecting or changing the radio frequencies  
10 or transmission methods used by the telecommunication device.
2. The device as claimed in claim 1 using a number of radio facilities (17, 18) or controllers and means for connecting or disconnecting these radio facilities or  
15 controllers in dependence on a control signal or on a number of control signals.
3. The device as claimed in one of the preceding claims using means for determining the position of the device and means for generating a control signal in  
20 dependence on the current position.

## Abstract

A mobile telecommunication device using a facility for transmitting messages to a multiplicity of subscriber stations via a number of radio frequencies or by means of different transmission methods and a facility for evaluating at least one control signal depending on the position of the telecommunication device for selecting or changing the radio frequencies or transmission methods used by the telecommunication device permits the location-dependent configuration of the radio frequencies and transmission methods. This provides for conformance with local differences in radio transmission regulations in satellite systems and other mobile radio systems.

Ich beanspruche hiermit gemäss Absatz 35 der Zivilprozessordnung der Vereinigten Staaten, Paragraph 120, den Vorzug aller unten aufgeführten Anmeldungen und falls der Gegenstand aus jedem Anspruch dieser Anmeldung nicht in einer früheren amerikanischen Patentanmeldung laut dem ersten Paragraphen des Absatzes 35 der Zivilprozessordnung der Vereinigten Staaten, Paragraph 122 offenbart ist, erkenne ich gemäss Absatz 37, Bundesgesetzbuch, Paragraph 1.56(a) meine Pflicht zur Offenbarung von Informationen an, die zwischen dem Anmeldedatum der früheren Anmeldung und dem nationalen oder PCT internationalen Anmeldedatum dieser Anmeldung bekannt geworden sind.

I hereby claim the benefit under Title 35, United States Code, §120 of any United States application(s) listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States application in the manner provided by the first paragraph of Title 35, United States Code, §122, I acknowledge the duty to disclose material information as defined in Title 37, Code of Federal Regulations, §1.56(a) which occurred between the filing date of the prior application and the national or PCT international filing date of this application.

Ich erkläre hiermit, dass alle von mir in der vorliegenden Erklärung gemachten Angaben nach meinem besten Wissen und Gewissen der vollen Wahrheit entsprechen, und dass ich diese eidesstattliche Erklärung in Kenntnis dessen abgebe, dass wissentlich und vorsätzlich falsche Angaben gemäss Paragraph 1001, Absatz 18 der Zivilprozessordnung der Vereinigten Staaten von Amerika mit Geldstrafe belegt und/oder Gefängnis bestraft werden können, und dass derartig wissentlich und vorsätzlich falsche Angaben die Gültigkeit der vorliegenden Patentanmeldung oder eines darauf erteilten Patentes gefährden können.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

## German Language Declaration

**VERTRETUNGSVOLLMACHT:** Als benannter Erfinder beauftrage ich hiermit den nachstehend benannten Patentanwalt (oder die nachstehend benannten Patentanwälte) und/oder Patent-Agenten mit der Verfolgung der vorliegenden Patentanmeldung sowie mit der Abwicklung aller damit verbundenen Geschäfte vor dem Patent- und Warenzeichenamt: (Name und Registrationsnummer anführen)

**POWER OF ATTORNEY:** As a named inventor, I hereby appoint the following attorney(s) and/or agent(s) to prosecute this application and transact all business in the Patent and Trademark Office connected therewith. (list name and registration number)

13

And I hereby appoint

Messrs. William E. Vaughan (Reg. No. 39,056); Robert M. Barrett (Reg. No. 30,142); Michael S. Leonard (Reg. No. 37,557); Patricia A. Kane (Reg. No. 46,446); Thomas C. Basso (Reg. No. P46,541); Robert W. Connors (Reg. No. P46,442); Troy A. Groetren (Reg. No. 46,442); Adam H. Masia (Reg. No. 35,602); Dante J. Picciano (Reg. No. 33,543); Amy J. Gast (Reg. No. 41,773); Timothy L. Harney (Reg. No. 38,174); Renato L. Smith (Reg. No. 45,117); and Alan L. Barry (Reg. No. 30,819)
